

ANNA OASIS V1 DOCUMENTATION

Modules explanation:

Users:

- Users can sign up and login
- Create hard coded login credentials for Manager, deputy warden and executive warden

Admission:

- Select student services
- Select admission
- If student has not filled up their personal details, fill the details
- View fee structure and make payment, submit transaction id
- Manager approves the transaction
- Any RC from the same hostel block can view manager-approved admissions and allots corresponding room in their block
- Deputy warden approval and then Executive warden approval
- If anybody declines, state reason

Readmission:

- When they select admission, we skip directly to the fee structure and payment since we already have the details
- Rest is same as above

Leave form (student):

- Under the student services, the student can go to leave_form route
- Fetch the student details using roll_number
- Fill form details and POST
- Corresponding RC for the floor approves
- Deputy warden approves
- If the student is female, generate a leave form pdf

Grievance

- Under the student services, the student can go to Grievance route
- Fetch the student details using roll_number
- Fill form details and POST
- Corresponding RC for the floor approves
- Manager can view the grievances, and mark them as resolved
- Deputy warden can view the grievances

Summer vacation

- Under the student services, the student can go to summer vacation route
- Fetch the student details using roll_number
- Fill form details and POST
- Corresponding RC for the floor approves
- Deputy warden approves

Vacating the hostel

- Under the student services, the student can go to vacating hostel route
- Fetch the student details using roll_number
- Fill form details and POST
- Corresponding RC for the floor approves
- Manager check caution deposit, enters deductions and refund amount then approves
- Deputy warden approves

RC Management

- In the dashboard of Deputy warden, they can create new credentials for RC
- They can assign the current list of RCs to floor and hostel block
- All of this will be kept track in RC data model

RC Leave

- In the dashboard of RC, they can apply for leave
- Deputy warden can view the RC leave application and also view the list of RCs currently available (not on leave) and decide to approve or decline

Attendance

- In the dashboard of RC, they can mark attendance for each day
- They get the list of students in the floors assigned to RC

- RC can mark checkboxes beside each student and submit the attendance records
- The attendance records can be viewed by both RC and Deputy warden

OUT Pass generation

- Under student services, students can generate outpass as pdf and take a print

Data Models:

User:

- id
- email
- password
- is_rc
- is_dw
- is_ew
- is_manager

RC:

- id
- name
- hostel
- floor [array]
- on_leave

student_details:

- user_id (Foreign key from Users)
- Personal details
- hostel_block
- room
- floor
- roll_number

admission:

- id
- roll_number (Foreign Key from student_details)
- academic year

- declaration (Boolean)
- transaction_id
- status (ENUM for approval status)

admission_approvals:

- admission_id (Foreign key from admission)
- user_id (Foreign key from Users)
- approve (Boolean)
- comment(Optional)
- timestamp

leave_form:

- id
- roll_number (Foreign key from student_details)
- form details

leave_form_approvals:

- leave_form_id (Foreign key from leave_form)
- user_id (Foreign key from Users)
- approve (Boolean)
- comment(Optional)
- timestamp

grievances:

- id
- roll_number (Foreign key from student_details)
- form details
- rc_approval
- resolved (Boolean)

summer_vacation:

- id
- roll_number (Foreign key from student_details)
- form details

- status (ENUM, -1 for declined)

summer_vacation_approvals:

- summer_vacation_id (Foreign key from summer_vacation)
- user_id (Foreign key from Users)
- approve (Boolean)
- comment(Optional)
- timestamp

vacating_hostel:

- id
- roll_number (Foreign key from student_details)
- form details
- status (ENUM, -1 for declined)

vacating_hostel_approvals:

- vacating_hostel_id (Foreign key from vacating_hostel)
- user_id (Foreign key from Users)
- approve (Boolean)
- comment(Optional)
- timestamp

caution_deposit_refund:

- vacating_hostel_id (Foreign key from vacating_hostel)
- deductions
- refund_amount
- timestamp

rc_leave:

- id
- rc_id (Foreign key from RC)
- leaving (Date)
- arrival (Date)
- reason
- approved (Boolean)

attendance:

- id
- date
- rc_id (Foreign key from RC)
- hostel
- floor
- no_present
- no_absent
- absentee [array of roll numbers]

API Endpoints:

\user\signup:

- POST – Register a user

\user\login:

- POST – Verify credentials and send back JWT along with user_id, role and if student, roll number

\user\role:

- GET – Check the token in the header and return the corresponding user_id and role and if student roll number

\student\details:

- GET – Use \roll_number as path param and fetch the corresponding student details
- POST – Create new student details
- PUT – Use \roll_number to edit and update existing student details

\student\admissions:

- POST – Create the admission for the student
- GET – \roll_number as path param and fetch the admission details and status of a particular student

\student\admissions\receipt:

- GET – \admission_id as path param, generate the fee receipt pdf for the admission

\student\leave:

- POST – Create a new leave form
- GET – fetch the details of all applied leave forms

\student\leave\pdf:

- GET – Fetch the generated leave form pdf

\student\grievance

- POST – Create a new grievance
- GET – \roll_number as path param, fetch the details of all grievances applied by the student

\student\summer_vacation:

- POST – Create a new summer vacation entry form
- GET – fetch the details of all applied summer_vacation forms

\student\vacating_hostel:

- POST – Create a new vacating_hostel entry form
- GET – fetch the details of all applied vacating_hostel forms

\manager\admissions

- GET – Fetch all admissions waiting for manager approval
- PUT – use \admission_id to approve or decline by manager, entry into admission_approval table with comment(if declined)

\manager\admissions\approvals:

- GET – Fetch all admissions approved or declined by the manager

\manager\grievance

- PUT – mark the grievance as resolved: TRUE (Request body contains grievance id)

- GET –fetch the details of all grievances waiting for approval from manager

\manager\vacating_hostel

- PUT – \vacating_hostel_id as path param, Enter caution deposit details into caution_deposit amount and then add entry to the vacating_hostel_approvals (Request body will contain data for the caution deposit amount and approve/decline)
- GET –fetch the details of all vacating_hostel waiting for approval from manager

\resident_counsellor\admissions

- GET – \rc_id as path param, Fetch all admissions waiting for RC approval belonging to the hostel block of the rc
- PUT – use \admission_id to approve or decline by rc, entry into admission_approval table with comment(if declined) and also update the corresponding student details with the room and floor (The request body will contain the approval, rc_id, student user_id, room and floor)

\resident_counsellor\admissions\approvals:

- GET – \rc_id as path param, Fetch all admissions approved or declined by the corresponding rc

\resident_counsellor\students:

- GET – \rc_id as path param, Fetch all roll

\resident_counsellor\student_leave:

- GET - \rc_id as path param, Fetch all student leave forms waiting for approval for this rc_id
- PUT - \rc_id as path param, approve the leave form by the RC and add entry into leave_form_approvals (request body will contain leave_form id and approve/decline)

\resident_counsellor\grievance

- PUT – \rc_id as path param, approve the grievance by rc (Request body contains grievance id and accept/decline)

- GET - \rc_id as path param, fetch the details of all grievances waiting for approval from rc

\resident_counsellor\summer_vacation:

- GET - \rc_id as path param, Fetch all summer_vacation forms waiting for approval for this rc_id
- PUT - \rc_id as path param, approve the summer_vacation by the RC and add entry into summer_vacation_approvals (request body will contain summer_vacation id and approve/decline)

\resident_counsellor\vacating_hostel:

- GET - \rc_id as path param, Fetch all vacating_hostel forms waiting for approval for this rc_id
- PUT - \rc_id as path param, approve the vacating_hostel by the RC and add entry into vacating_hostel_approvals (request body will contain vacating_hostel id and approve/decline)

\resident_counsellor\leave:

- GET - \rc_id as path param, Fetch all rc_leave details applied through this rc_id
- POST - \rc_id as path param, Create a new rc_leave entry

\resident_counsellor\attendance:

- GET - \rc_id as path param, Fetch all attendance records submitted through this rc_id
- POST - \rc_id as path param, Create a new attendance entry for today

\deputy_warden\admissions

- GET - Fetch all admissions waiting for deputy warden approval
- PUT – use \admission_id to approve or decline by deputy warden, entry into admission_approval table with comment(if declined) (The request body will contain the approval, student user_id, room and floor)

\deputy_warden\admissions\approvals:

- GET – Fetch all admissions approved or declined by the deputy warden

\deputy_warden\student_leave:

- GET - Fetch all summer_vacation forms waiting for approval from deputy warden
- PUT - \ summer_vacation _id as path param, approve the summer_vacation by Deputy warden and entry into summer_vacation _approvals (request body will contain summer_vacation id and approve/decline)

\deputy_warden\grievance

- GET – Fetch all grievances data

\deputy_warden\summer_vacation:

- GET - Fetch all summer_vacation forms waiting for approval from deputy warden
- PUT - \summer_vacation_id as path param, approve the summer_vacation by Deputy warden and entry into summer_vacation_approvals

\deputy_warden\vacating_hostel:

- GET - Fetch all vacating_hostel forms waiting for approval from deputy warden
- PUT - \vacating_hostel_id as path param, approve the vacating_form by Deputy warden and entry into vacating_form_approvals

\deputy_warden\rc:

- GET - Fetch all RCs currently in
- POST – Create a new RC credentials into Users table, add the RC in RC table
- PUT - \rc_id as path param, update the hostel block and floors assigned to the RC (Request body contains the floors)
- DELETE – Delete RC credentials from Users and in RC table

\deputy_warden\rc\leave:

- GET - Fetch all rc leave form details
- PUT - \rc_leave_id as path param, Approve or deny the leave form

\deputy_warden\attendance:

- GET - Fetch all attendance records

\executive_warden\admissions

- GET - Fetch all admissions waiting for executive warden approval
- PUT – use \admission_id to approve or decline by executive warden, entry into admission_approval table with comment(if declined) (The request body will contain the approval, student user_id, room and floor)

\executive_warden\admissions\approvals:

- GET – Fetch all admissions approved or declined by the executive warden

PDFs to be generated:

- Undertaking and declaration form
- Fee receipt for admission
- Leave form
- Outpass generation

Files to be stored:

- Passport photo of students
- Passport of students
- Aadhar
- College admission slip
- Student signature
- Parent's signature
